**The Community HeartBeat Trust**

---

Notes:

Quote valid until 30 February 2017.

A Managed Solution approach also includes all insurances, Public liability, post rescue counselling, and support.

The initial training and awareness session will be done with CHT. I have costed only a single session initially.

If done as a commercial purchase VAT will be added at current rates, and insurances will not be included.

Alternative defibrillator equipment can be provided if a commercial transaction. If Managed solution only the Lifeline VIEW or Cardiac Science G5 defibrillators will be provided as CHT are accepting the liabilities.

Installation has not been included.

For a locked ShockBox Sentry stainless steel cabinet add £250. For an EcoPad add £350.
